AI Usage Declaration

23127122 - Nguyễn Duy Thịnh

1. General Information

- **Tool name, version, and platform:** GPT 5.3 Codex, Medium thinking
- **Access time:** 2026-04-15

2. Usage Details

- **Prompt used:** "hey can you create seed data for the social feature group (post, comments, share post,..) using applicationrunner or commandlinerunner or something like that"
- **Purpose of use:** To generate seed data for the social feature group, including posts, comments, and share post data, to facilitate testing and development.

3. Content Declaration

- **Which content was generated by AI:**
 - SocialSeedDataRunner.java
- **Which content I modified after AI generation:**
 - Nothing, it ran correctly without any modification needed.

4. Evidence of AI Usage

hey can you create seed data for the social feature group (post, comments, share post,..) using applicationrunner or commandlinerunner or something like that

23127205 - Lâm Hữu Khánh

1. General Information

- **Tool name, version, and platform:** Claude Sonnet 4.6 (Anthropic)
- **Access time:** 2026-04-15 to 2026-04-18

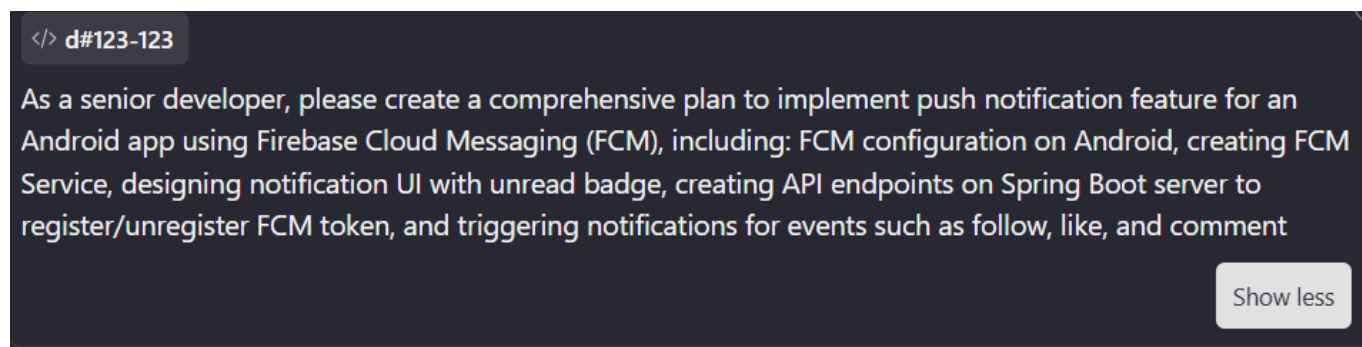

2. Usage Details

- **Prompt used:** "As a senior developer, please create a comprehensive plan to implement push notification feature for an Android app using Firebase Cloud Messaging (FCM), including: FCM configuration on Android, creating FCM Service, designing notification UI with unread badge, creating API endpoints on Spring Boot server to register/unregister FCM token, and triggering notifications for events such as follow, like, and comment."
- **Purpose of use:** To create a comprehensive implementation plan for push notifications using Firebase Cloud Messaging, covering Android client setup, FCM service implementation, notification UI with unread badge, server-side API endpoints for token management, and event-driven notification triggers.

3. Content Declaration

- **Which content was generated by AI:**
 - A detailed implementation plan for FCM push notifications, including Android manifest configuration, FCM service class structure, notification API endpoints on Spring Boot, and notification trigger logic in SocialService.
- **Which content I modified after AI generation:**
 - I modified the FCM service class and notification trigger logic to fit the existing project architecture and coding conventions.

4. Evidence of AI Usage

23127326 - Lê Mai Hoài Bảo

1. General Information

- **Tool name, version, and platform:** Claude Opus 4.6 (Anthropic)
- **Access time:** 2026-04-18 13:00

2. Usage Details

- **Prompt used:** "Trong vai một senior developer, hãy lên một plan toàn diện nhất để implement tính năng tìm một recipe từ backend đến frontend (lưu ý rằng frontend đã có cái nút tìm)"
- **Purpose of use:** To create a comprehensive plan for implementing the "like" feature for recipes, covering both backend and frontend aspects, ensuring that the existing "like" button in the frontend is properly integrated with the backend functionality.

3. Content Declaration

- **Which content was generated by AI:**
 - A detailed implementation plan for the "like" feature, including database schema changes, API endpoints, and frontend integration steps.
- **Which content I modified after AI generation:**
 - I run code and it works correctly without any modification needed.

4. Evidence of AI Usage

Trong vai một senior developer, hãy lên một plan toàn diện nhất để implement tính năng tìm một recipe từ backend đến frontend (lưu ý rằng frontend đã có cái nút tìm)

23127357 - Lê Anh Duy

1. General Information

- **Tool name, version, and platform:** Claude Sonnet 4.6 (Anthropic), Codex 5.3
- **Access time:** 2026-04-12 to 2026-04-18

2. Usage Details

- **Prompt used:**

yes but in the recipe page, it is very inconvenient for user to navigate back to the suggest page and enter the ingredients as well as can send the recipe id for the backend (are you already check the backend?) please plan the implement phase and write down into the markdown

- **Purpose of use:** To create the plan and code for the UI of "Change Ingredient using AI" feature, which allows users to modify the ingredients of a recipe using AI.

3. Content Declaration

- **Which content was generated by AI:**
 - A detailed implementation plan for the "Change Ingredient using AI" feature, including UI design, API integration, and frontend implementation steps.
 - `fragment_recipe_details.xml`, `IngredientReplacementRequest.java`, `IngredientReplacementResponse.java`, `RecipeDetailsViewModel.java`.
