

Weekly Report

General Information

Group ID: 03
Project Name: Yum Recipe
Date Range: 2026-03-15 – 2026-03-21

Tasks Completed This Week

23127122 - Nguyễn Duy Thịnh

- Finalized the social feed database design.
- Implemented the backend core layers, including Entities and Services, to support feed functionality.

► Evidence

- Commit Message:

	server: add post related basic se	Stephrss05	9 minutes ago
	server: add post related repositories	Stephrss05	Today 14:48
	server: add post basic repository	Stephrss05	Today 14:17
	update post entities for easier retrieving	Stephrss05	Today 13:57
	Add entities for post like and comment	Stephrss05	Yesterday 22:40
	Add db tables for post like and comment	Stephrss05	Yesterday 22:29
	Add necessary entities for posts	Stephrss05	Yesterday 15:34
	Add db changelog for posts	Stephrss05	Yesterday 15:06

23127205 - Lâm Hữu Khánh

- Implemented the FE for Login/Signup/Forgot & Reset Password screen
- Designed the Profile Management screen
- Bound Authorize API to the UI

23127326 - Lê Mai Hoài Bảo

- Implement the API to create a new recipe.
- Implement the API to edit an existing recipe.
- Implement the API to delete a recipe.
- Design the screen for the recipe details.
- Design the screen for creating and editing a recipe.

► Evidence

- API create, edit, delete recipe:

POST /api/recipes Create a recipe

Create a new recipe as the authenticated user.

Parameters

Cancel

No parameters

Request body required

application/json

```

commit 687e4ffc0aa00ec222e4c84ffeb6cd58e03b2fce (HEAD -> feature/recipe-management, origin/feature/recipe-management)
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Sat Mar 21 15:34:48 2026 +0700

    feat: Implement the API to delete recipe

commit 86922a90af4977df7ddfb62e0b6175fd253389d2
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Sat Mar 21 13:49:23 2026 +0700

    feat: Add field of recipe and fix search API

commit fca8a0a74527d5aa2cb9ba225f79accb0bbbaefa
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Sat Mar 21 08:27:59 2026 +0700

    feat: fix search with VietNameese keyword

commit e6def3904ba9da06fb3bac5ba6a22f377e1522b2
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Sat Mar 21 00:23:52 2026 +0700

    feat: implement API to edit recipe

commit d197024d9df48011318470983d671fc24dfbbcd0
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Fri Mar 20 23:45:02 2026 +0700

    feat: fix bug of swagger

commit 21151757dbf37f94cb5dfd28cf988d78937c3661
Merge: 47e6dd1 664cd46
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Fri Mar 20 23:34:01 2026 +0700

    Merge branch 'feature/recipe-management' of https://github.com/lad94220/cooking-recipe into feature/recipe-management

commit 47e6dd1542bb07bc89a589409a4ecbc1a94be076
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Tue Mar 17 16:44:46 2026 +0700

    feat: Implement recipe creation functionality with new DTO, service logic, controller endpoint, and tests
```

23127357 - Lê Anh Duy

- Implement Shopping List.
- Binding Suggestion API to UI.
- Implement Meal Planner UI.
- Implement Cache.

► Evidence

Commits on Mar 17, 2026

AI Usage Declaration

23127122 - Nguyễn Duy Thịnh

1. General Information

- **Tool name, version, and platform:** Anthropic Claude Sonet 4.6.
- **Access time:** 20/03/2026.

2. Usage Details

- **Prompts used:**
- Using Claude to brainstorm how to design the social feed database.

given this current database

List of tables

Schema	Name	Type	Owner
public	databasechangelog	table	postgres
public	databasechangelock	table	postgres
public	follows	table	postgres
public	fridge_items	table	postgres
public	meal_plans	table	postgres

Show more

Mar 14   

Looking at your feature group 3 (community interaction, sharing, tips/guides, events/challenges), let me think through what the database needs to support.

- **Purpose of use:**
- Using AI to easily understand how tables/relationships interact in a typical social media app.

3. Content Declaration

- **Which content was generated by AI:**
 - None

23127205 - Lâm Hữu Khánh

1. General Information

- **Tool name, version, and platform:** Claude Opus (Anthropic).
- **Access time:** 20:00 March 18, 2026.

2. Usage Details

- **Prompts used:**
 - "Use your all potential to read the structure of this source code carefully, then help me to complete these task:
 - Completed the UI screen (Login/Signup/ForgotPassword)
 - Binding the API to UI
 - Check the security for these API."
- **Purpose of use:** To complete UI screens (Login/Signup/ForgotPassword), bind API to UI, and check security for the APIs.

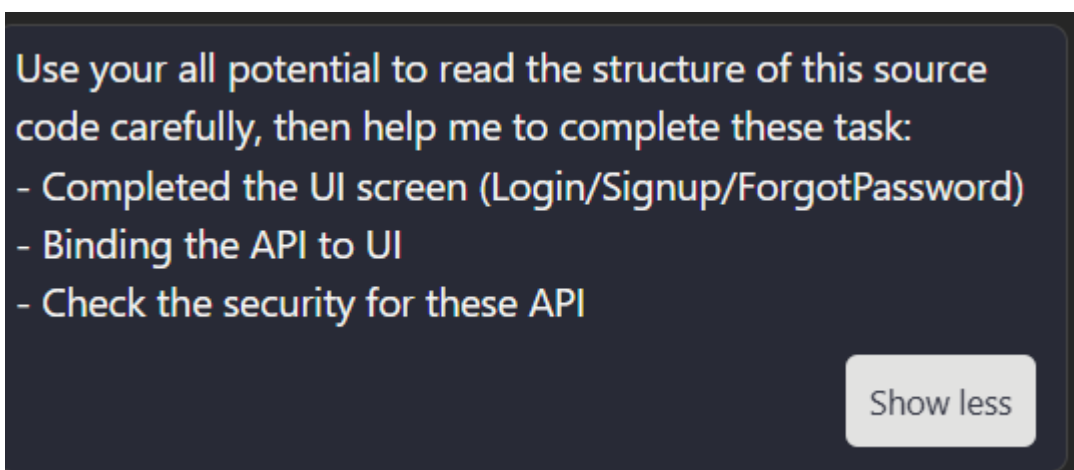

3. Content Declaration

- **Which content was generated by AI:**
 - `JwtService.java`, `JwtAuthFilter.java`, `SecurityConfig.java` – JWT and Spring Security boilerplate.
 - `AuthDto.java` and all request/response models – DTO boilerplate.
 - `AuthApiService.java` – Retrofit interface boilerplate.

- `fragment_login.xml`, `fragment_register.xml`, `fragment_forgot_password.xml`, `fragment_reset_password.xml` – UI layout boilerplate with branding and design system.
- `AuthController.java` – Spring Security controller with email enumeration prevention and SecureRandom OTP generation.
- `EmailService.java` – Email service boilerplate for password reset.
- `AuthViewModel.java`, `AuthRepository.java` – ViewModel and Repository boilerplate for API binding.
- **Which content was done independently and how I edited and validated it:**
 - Custom OTP input styling and consistent design system applied to all auth UI layouts.
 - Bound `AuthApiService` to all auth UI components via `AuthViewModel` and `AuthRepository`.
 - Integrated JWT with `EncryptedSharedPreferences` (AES256-GCM) for secure token storage.
 - Added Google OAuth verification logic to `AuthController.java`.
 - Compiled successfully and tested end-to-end authentication flow.

4. Evidence

- **Prompts:**

23127326 - Lê Mai Hoài Bảo

Prompt 1: Implement the API to create a new recipe and create the unit test for it.

1. General Information

- **Tool name, version, and platform:** Gemini 3.1 Pro (Antigravity model), Google, gemini.google.com.
- **Access time:** 20:30 on March 18, 2026.

2. Usage Details

- **Prompts used:** "Implement the API to create a new recipe and create the unit test for it."
- **Purpose of use:** To implement the API for creating a new recipe and to create corresponding unit tests.

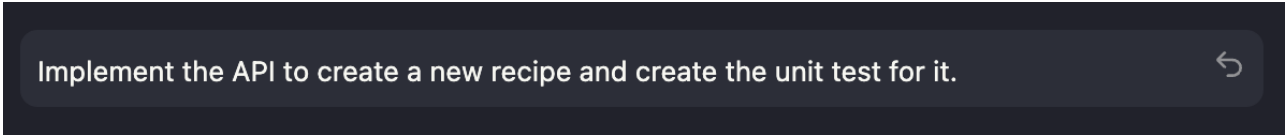

3. Content Declaration

- **Which content was generated by AI:**

- `RecipeController.java` – REST controller with endpoints for creating recipes, including validation and error handling.
- `RecipeService.java` – Service layer with business logic for recipe creation, including ingredient validation.
- `CreateRecipeRequest.java` - DTO for recipe creation request.
- `RecipeControllerTest.java` – JUnit test class with Mockito for unit testing the `RecipeController`.
- `RecipeServiceTest.java` – JUnit test class with Mockito for unit testing the `RecipeService`.
- **Which content was done independently and how I edited and validated it:**
 - Read and understood the generated code to ensure it met our project requirements and coding standards.
 - Performed integration testing using Swagger UI to verify API functionality and error handling.
 - **Technical Verification:** Executed `./gradlew compileJava` to ensure code compatibility and syntax correctness.

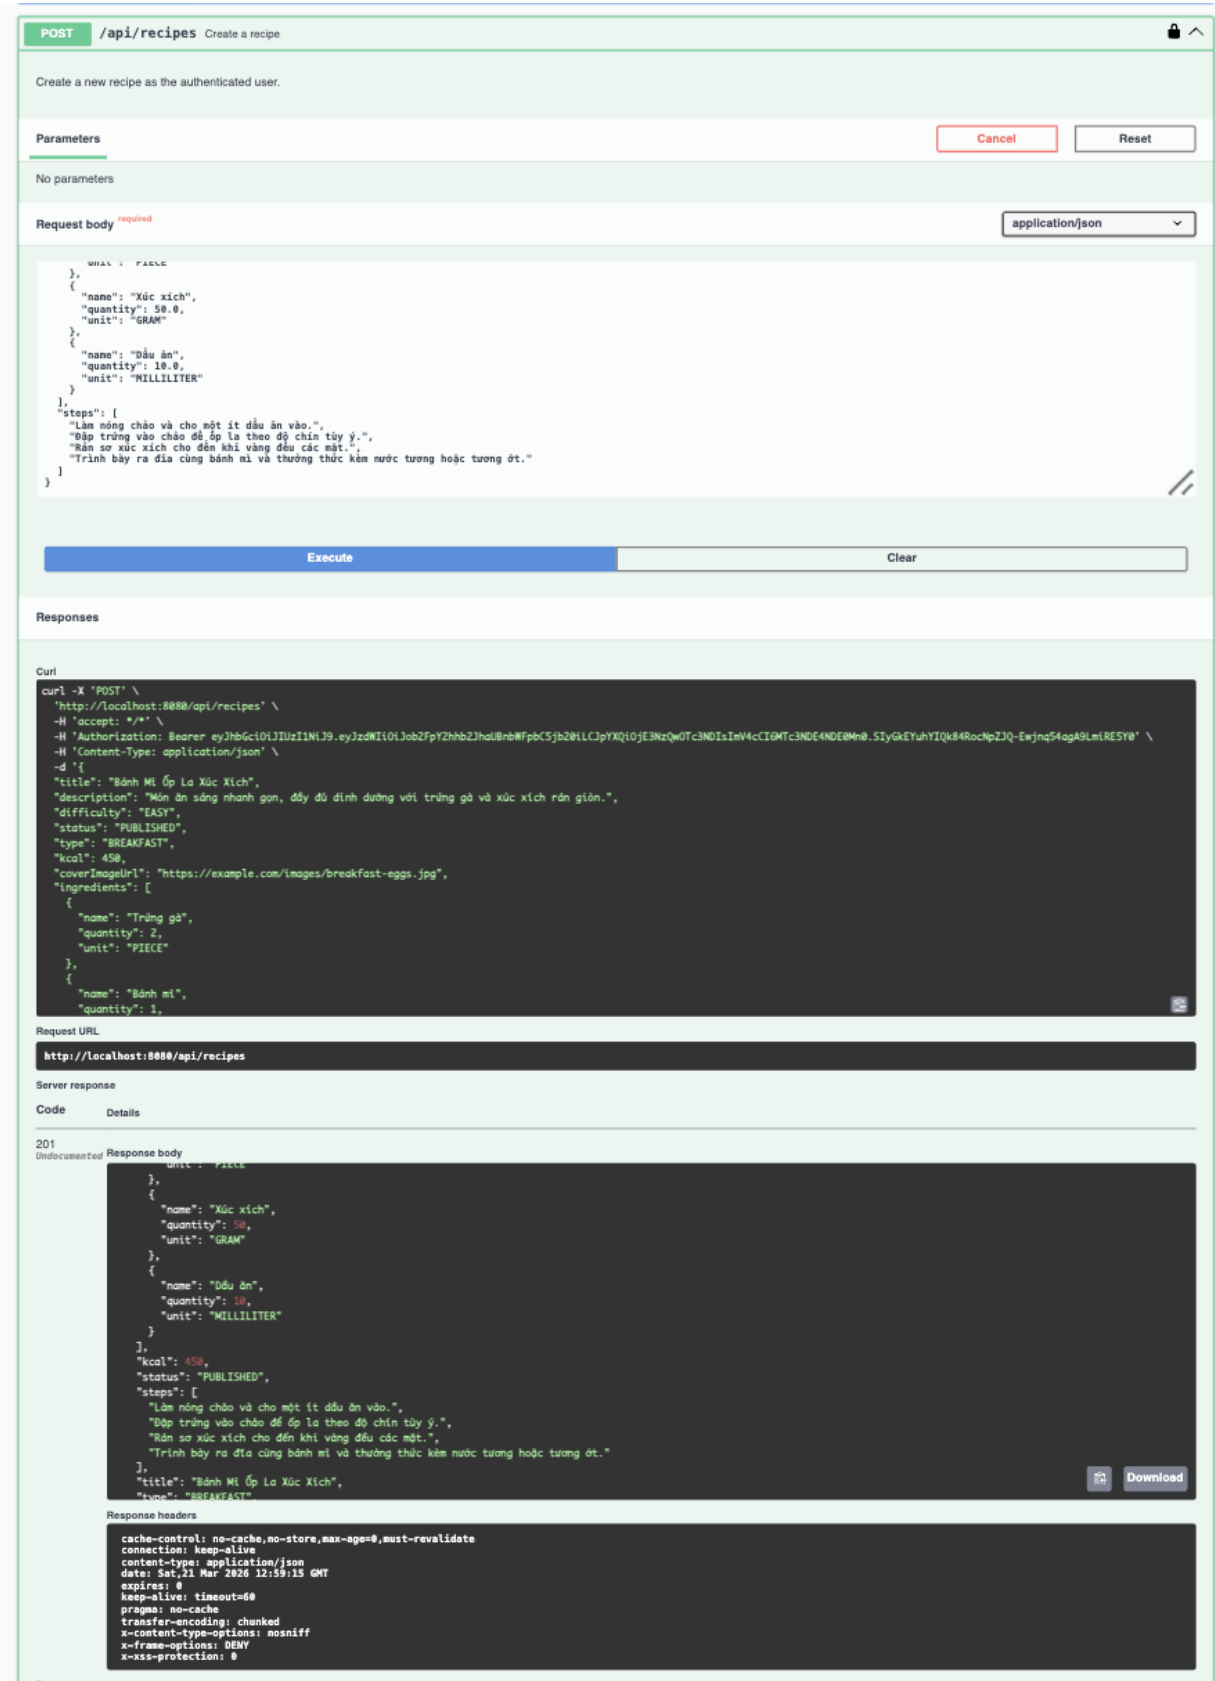

4. Evidence

- **Prompts:**

Implement the API to create a new recipe and create the unit test for it.

- **Testing Evidence:**

• **Compilation Evidence:**

```

(base) HB4305 ~/KhoChua/DH/Nam3/HK2/MOBILE/cooking-recipe/server % ./gradlew compileJava

BUILD SUCCESSFUL in 674ms
1 actionable task: 1 up-to-date
Consider enabling configuration cache to speed up this build: https://docs.gradle.org/9.3.1/userguide/configuration_cache_enabling.html
(base) HB4305 ~/KhoChua/DH/Nam3/HK2/MOBILE/cooking-recipe/server %
```

Prompt 2: Implement the API to edit an existing recipe

1. General Information

- **Tool name, version, and platform:** Claude Opus (Anthropic).
- **Access time:** 13:00 on March 21, 2026.

2. Usage Details

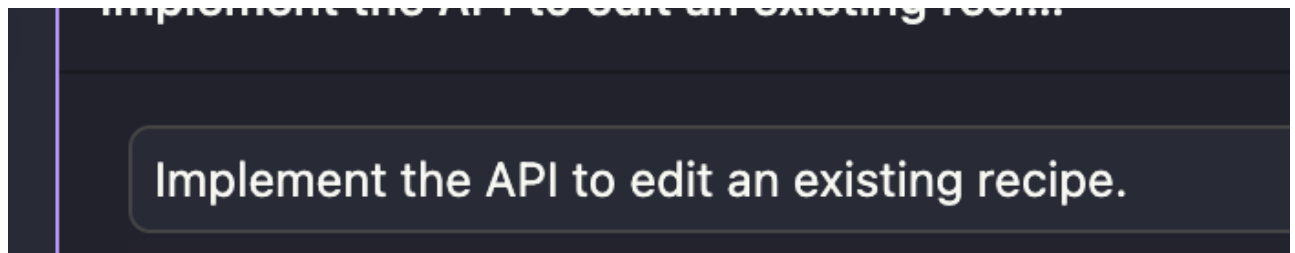

- **Prompts used:** "Implement the API to edit an existing recipe".
- **Purpose of use:** To implement the API for editing an existing recipe.

3. Content Declaration

- **Which content was generated by AI:**
 - `RecipeController.java` – Added endpoint for editing recipes with validation and error handling.
 - `RecipeService.java` – Added business logic for editing recipes, including ingredient validation.
 - `UpdateRecipeRequest.java` - DTO for recipe editing request.
- **Which content was done independently and how I edited and validated it:**
 - Reviewed the generated code to ensure it aligned with our project requirements and coding standards.
 - Performed integration testing using Swagger UI to verify API functionality and error handling.
 - Technical Verification: Executed `./gradlew compileJava` to ensure code compatibility and syntax correctness.

4. Evidence

- **Prompts:**

- **Testing Evidence:**

- Update with full payload:

PUT

Prompt 3: Implement the API to delete a recipe

1. General Information

- **Tool name, version, and platform:** Claude Opus (Anthropic).
- **Access time:** 16:00 on March 21, 2026.

2. Usage Details

- **Prompts used:** "Implement the API to delete a recipe".
- **Purpose of use:** To implement the API for deleting a recipe.

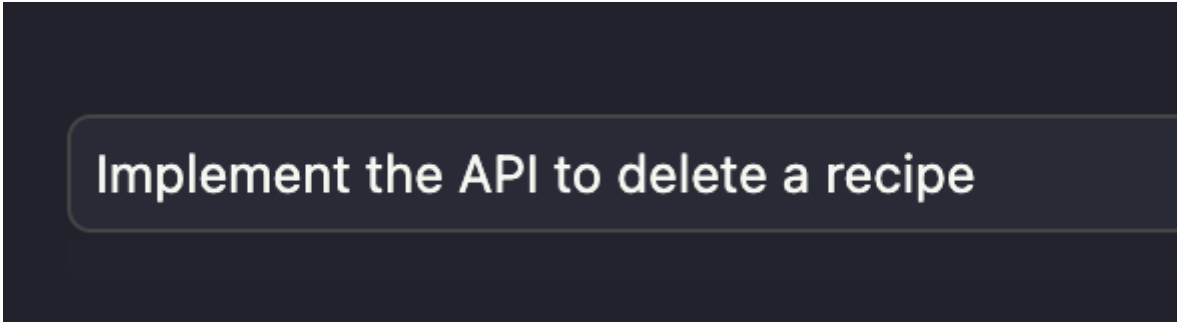

3. Content Declaration

- **Which content was generated by AI:**
 - `RecipeController.java` – Added endpoint for deleting recipes with validation and error handling.

- `RecipeService.java` – Added business logic for deleting recipes, including ownership validation.
- **Which content was done independently and how I edited and validated it:**
 - Reviewed the generated code to ensure it met our project requirements and coding standards.
 - Performed integration testing using Swagger UI to verify API functionality and error handling.
 - Technical Verification: Executed `./gradlew compileJava` to ensure code compatibility and syntax correctness.

4. Evidence

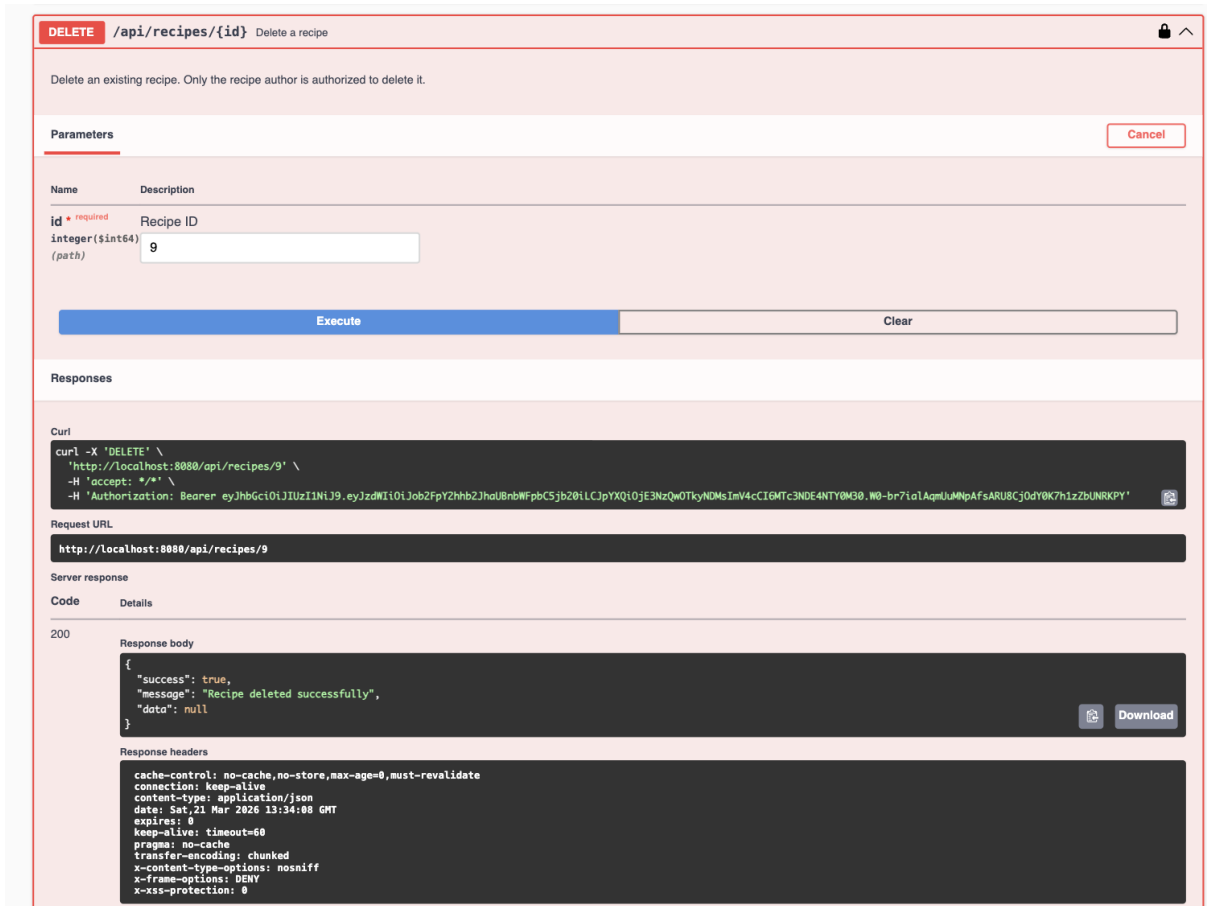

- **Prompts:**

Implement the API to delete a recipe

- **Testing Evidence:**

- Delete with valid Id:

DELETE `/api/recipes/{id}` Delete a recipe

Delete an existing recipe. Only the recipe author is authorized to delete it.

Parameters Cancel

Name	Description
id required <code>integer(int64)</code> (path)	Recipe ID

Execute Clear

Responses

200

Response body

```
{
  "success": true,
  "message": "Recipe deleted successfully",
  "data": null
}
```

Download

Response headers

```
cache-control: no-cache,no-store,max-age=0,must-revalidate
connection: keep-alive
content-type: application/json
date: Sat, 21 Mar 2026 13:34:08 GMT
expires: 0
keep-alive: timeout=60
pragma: no-cache
transfer-encoding: chunked
x-content-type-options: nosniff
x-frame-options: DENY
x-xss-protection: 0
```

- Delete with Id that does not exist:

DELETE

/api/recipes/{id}

Delete a recipe

Delete an existing recipe. Only the recipe author is authorized to delete it.

Parameters

Cancel

Name	Description
id required	Recipe ID
integer(\$int64) (path)	100

Execute

Clear

Responses

Curl

```
curl -X 'DELETE' \
'http://localhost:8080/api/recipes/100' \
-H 'accept: */*' \

23127357 - Lê Anh Duy

1. General Information

- **Tool name, version, and platform:** Gemini 3.1 Pro Preview, ChatGPT 5.1, Stich (Gemini 3.1 Pro Preview), Anthropic Claude Sonet 4.6.
- **Access time:** From 14/03/2026 to 21/03/2026.

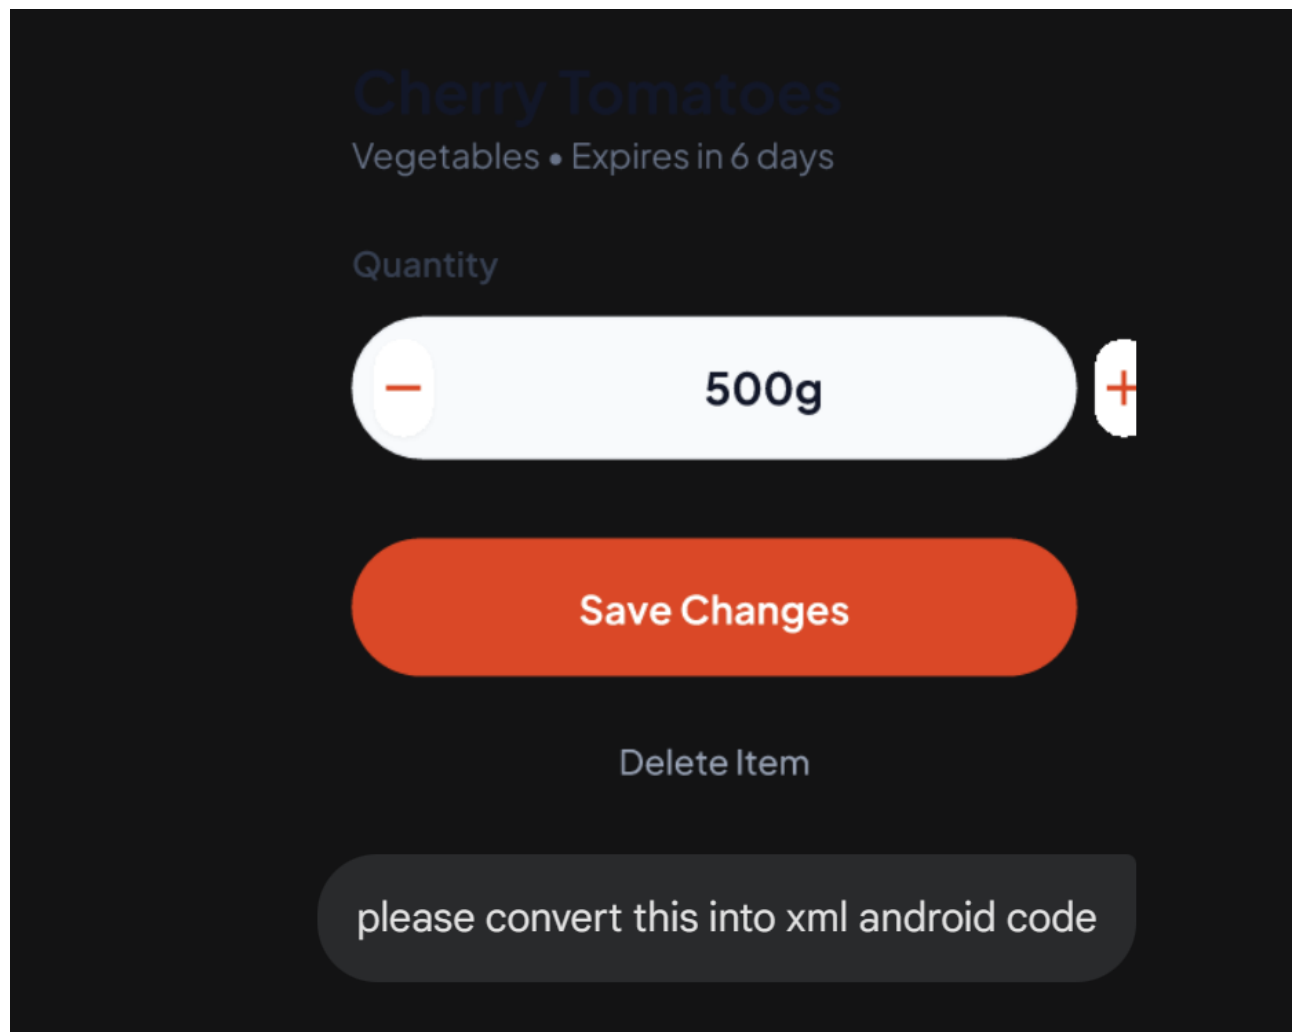

2. Usage Details

- **Prompts used:**
- Using to generate UI design and convert from .svg into android .xml.

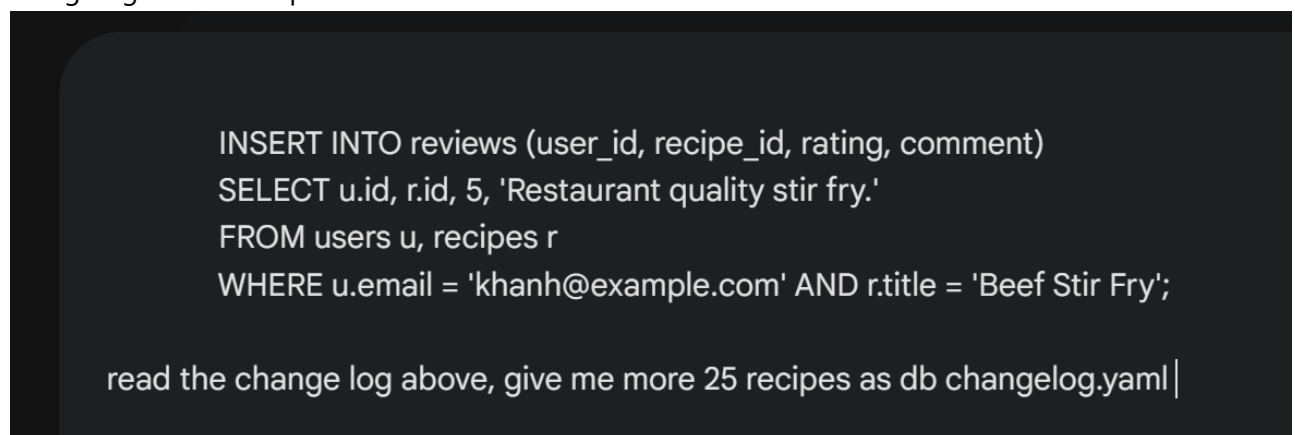

Duy Lê Anh

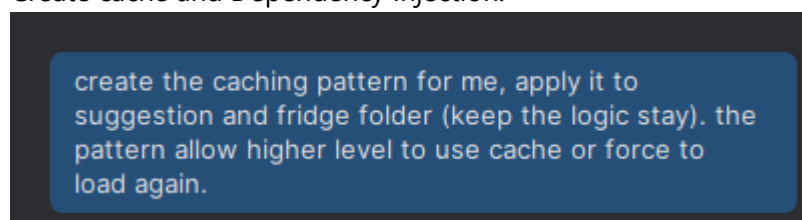

at the fridge manager screen, please design for me the shopping list screen, allow user to add the shopping item, each item has the checkbox that user can check and delete button to delete each item.

- Using to generate sample data.

- Create cache and Dependency Injection.

- **Purpose of use:**
- Using to generate mock data automatically.
- Using to code efficiently.

3. Content Declaration

- **Which content was generated by AI:**
 - The UI layout: `component_fridge_item_details.xml`, `component_item_date.xml`, `component_page_header.xml`, `component_plan_suggest_item.xml`, `fragment_meal_planner.xml`, `AuthModule.java`, `NetworkModule.java`, `DatabaseModule.java`.

Tasks Planned for Next Week

23127122 - Nguyễn Duy Thịnh

- Finish up the API to create/delete/like/share a post in the social feed.
- Implement the UI to display the social feed and post details.
- Bind the social feed APIs to the UI.

23127205 - Lâm Hữu Khánh

- Implement the Profile Management API.
- Implement the Profile Management UI.

23127326 - Lê Mai Hoài Bảo

- Implement the feature to view recipe details (ingredients, quantities, etc.).
- Develop hands-free cooking mode using SpeechRecognizer API.
- Add timer functionality for cooking steps.

23127357 - Lê Anh Duy

- Implement the MealPlanner APIs.
- Add kcal to recipe creation.
- Binding the MealPlanner APIs to the UI.
