

Weekly Report

General Information

Group ID: 03

Project Name: Yum Recipe

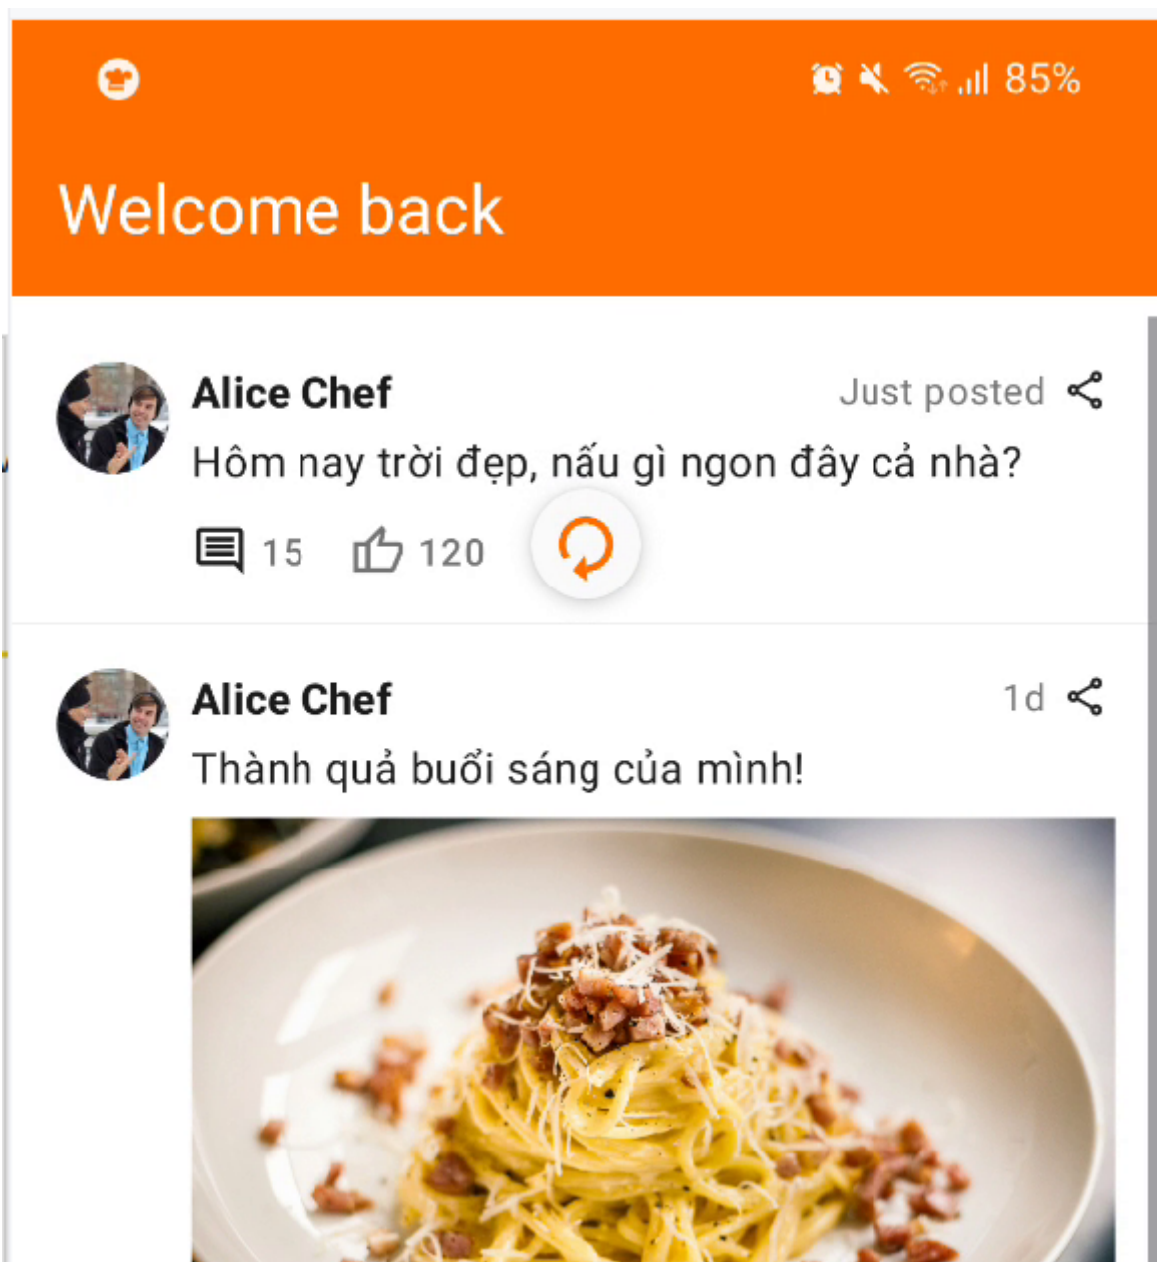

Date Range: 2026-04-05 – 2026-04-11

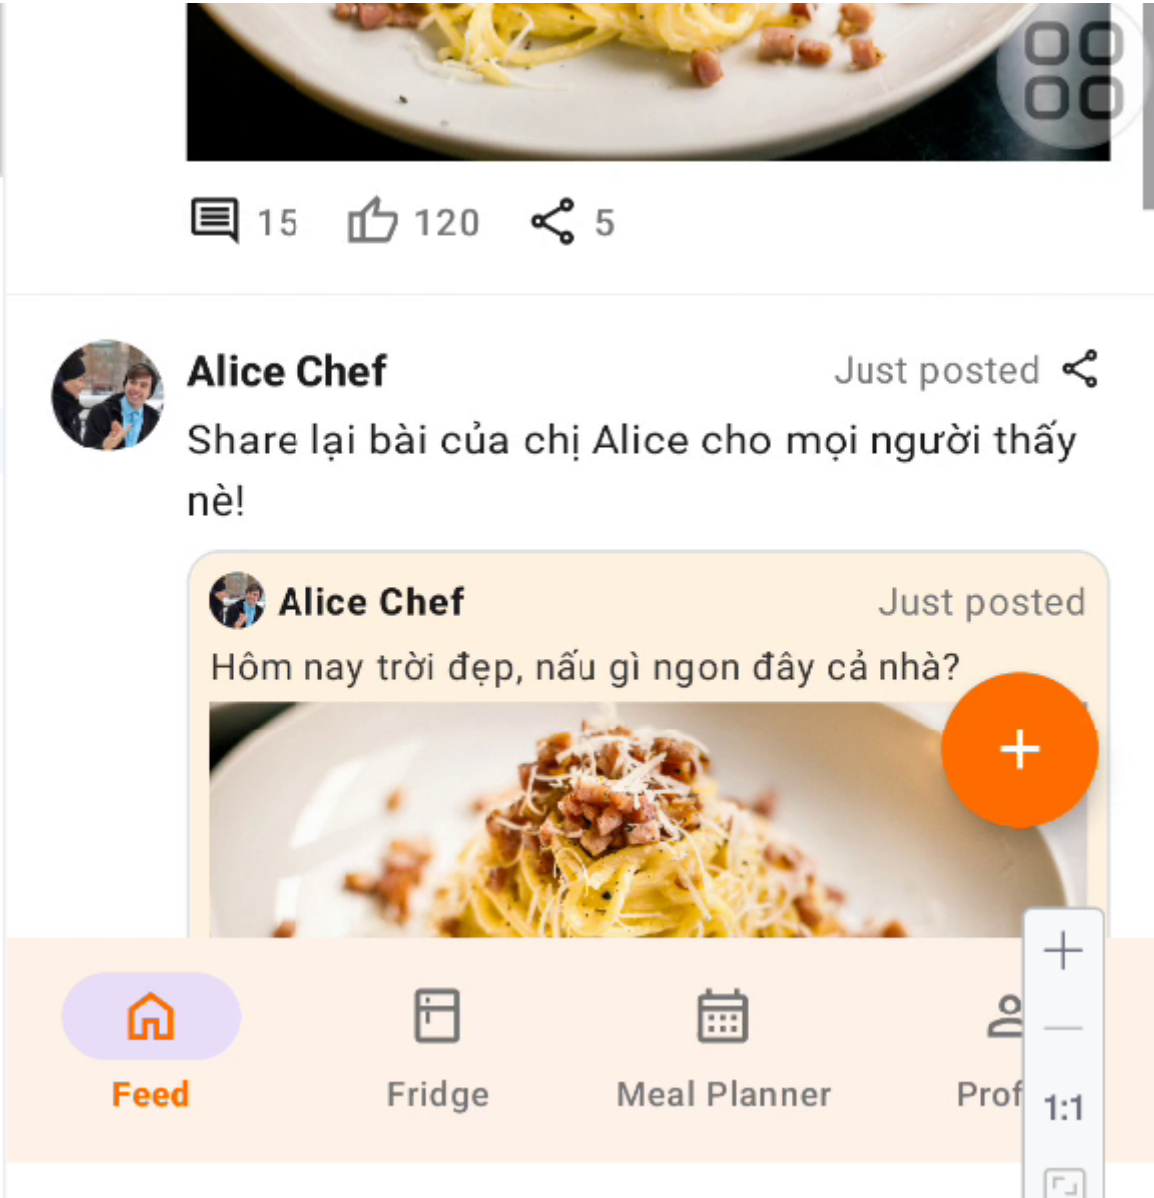

Tasks Completed This Week

23127122 - Nguyễn Duy Thịnh

- Implemented the feed social feature server-side, integrated Redis for retrieving post.
- Refactored the Android social code so it can work with the new API and added pagination for the feed.
- Creating the article feature API.

```

23127205 - Lâm Hữu Khánh

- Integrate recipe detail navigation from Profile (My Recipes) so users can open full recipe details from their personal recipe list.
- Implement private profile visibility logic with mutual-follow checks to control access to profile information and private recipes.
- Migrate profile image saving flow from Base64 data URI to Cloudinary URL upload (multipart upload + save URL in profile).

23127326 - Lê Mai Hoài Bảo

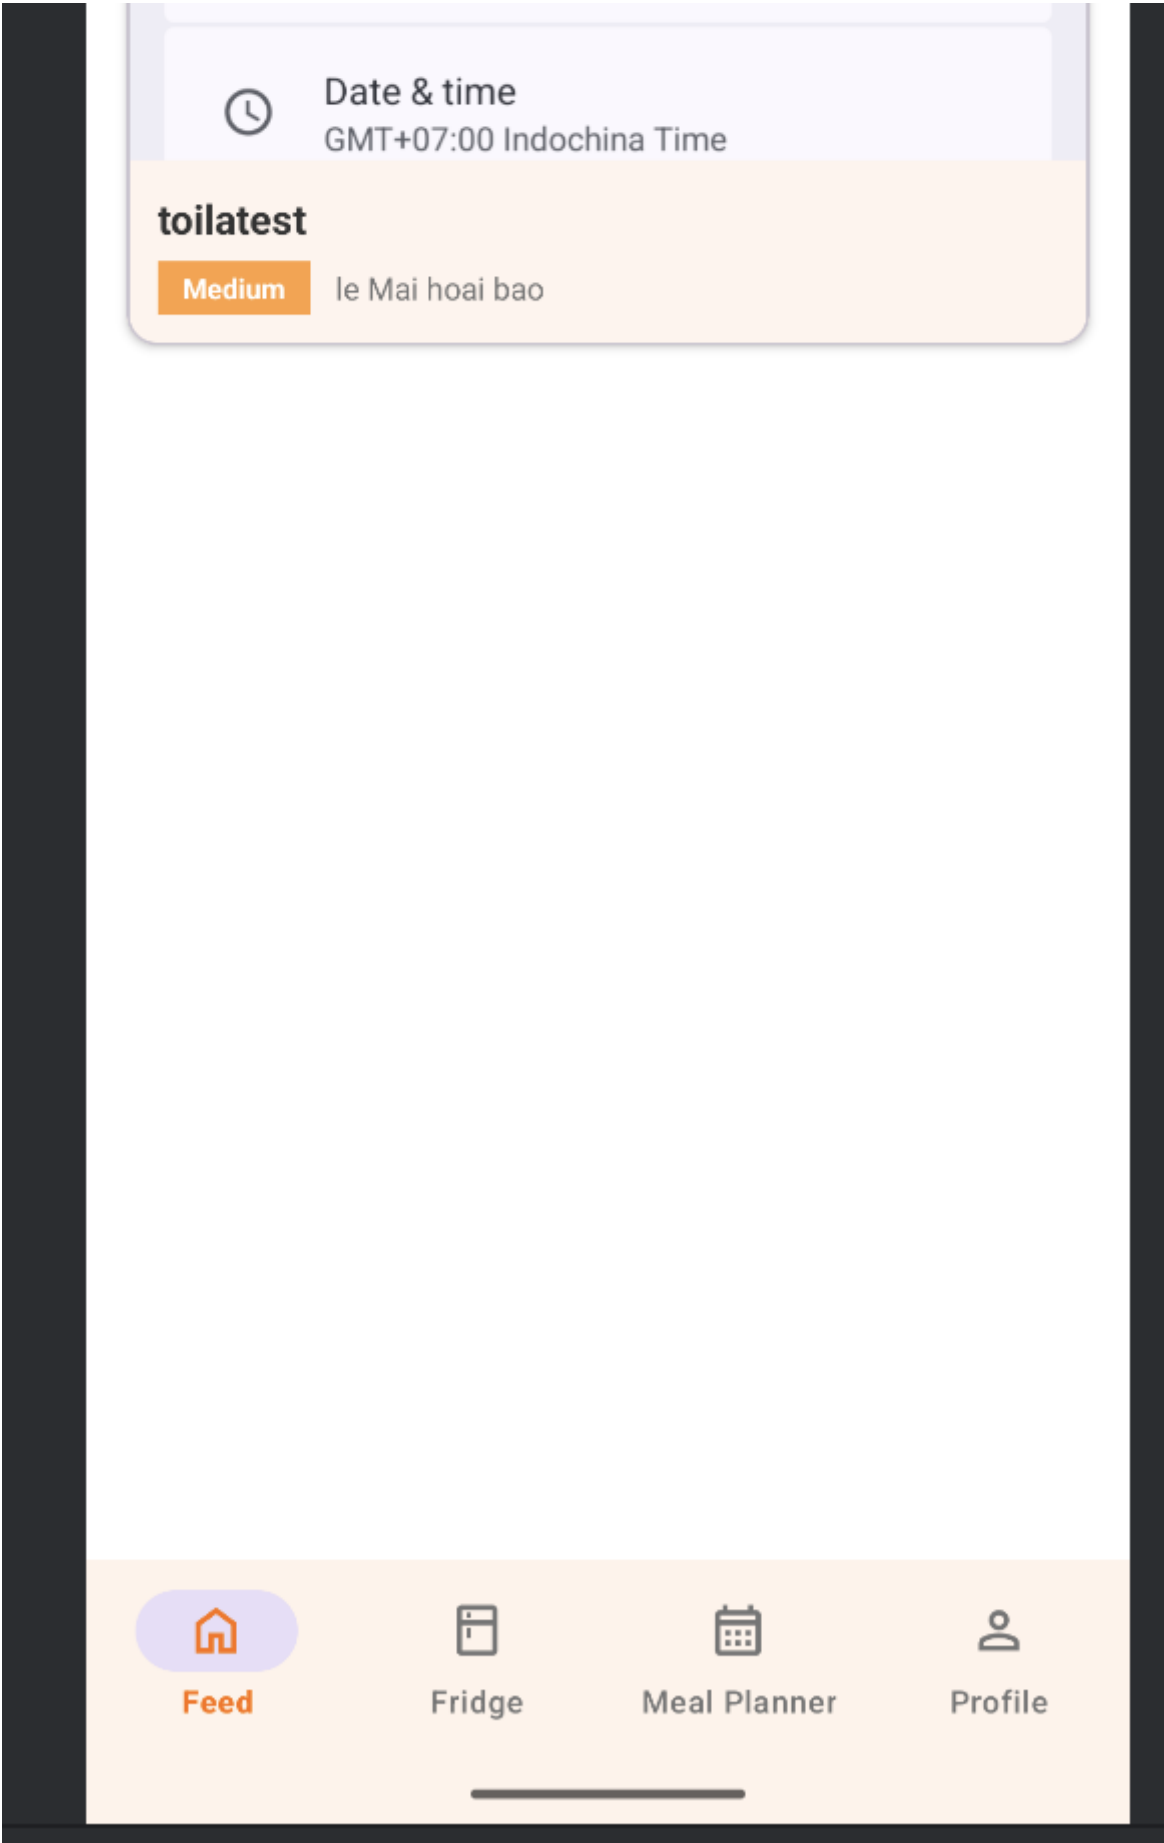

- Implement a UI for the search function and integrate the API into it.
- Add the Ingredients table to the database for search and filtering purposes.
- Integrate the recipe detail view into the search results page.
- Modify the create recipe to add a timer for each step.
- Setup Cloudinary for image storage and implement image upload functionality in the create recipe page.

► Evidence

- UI for search recipe:

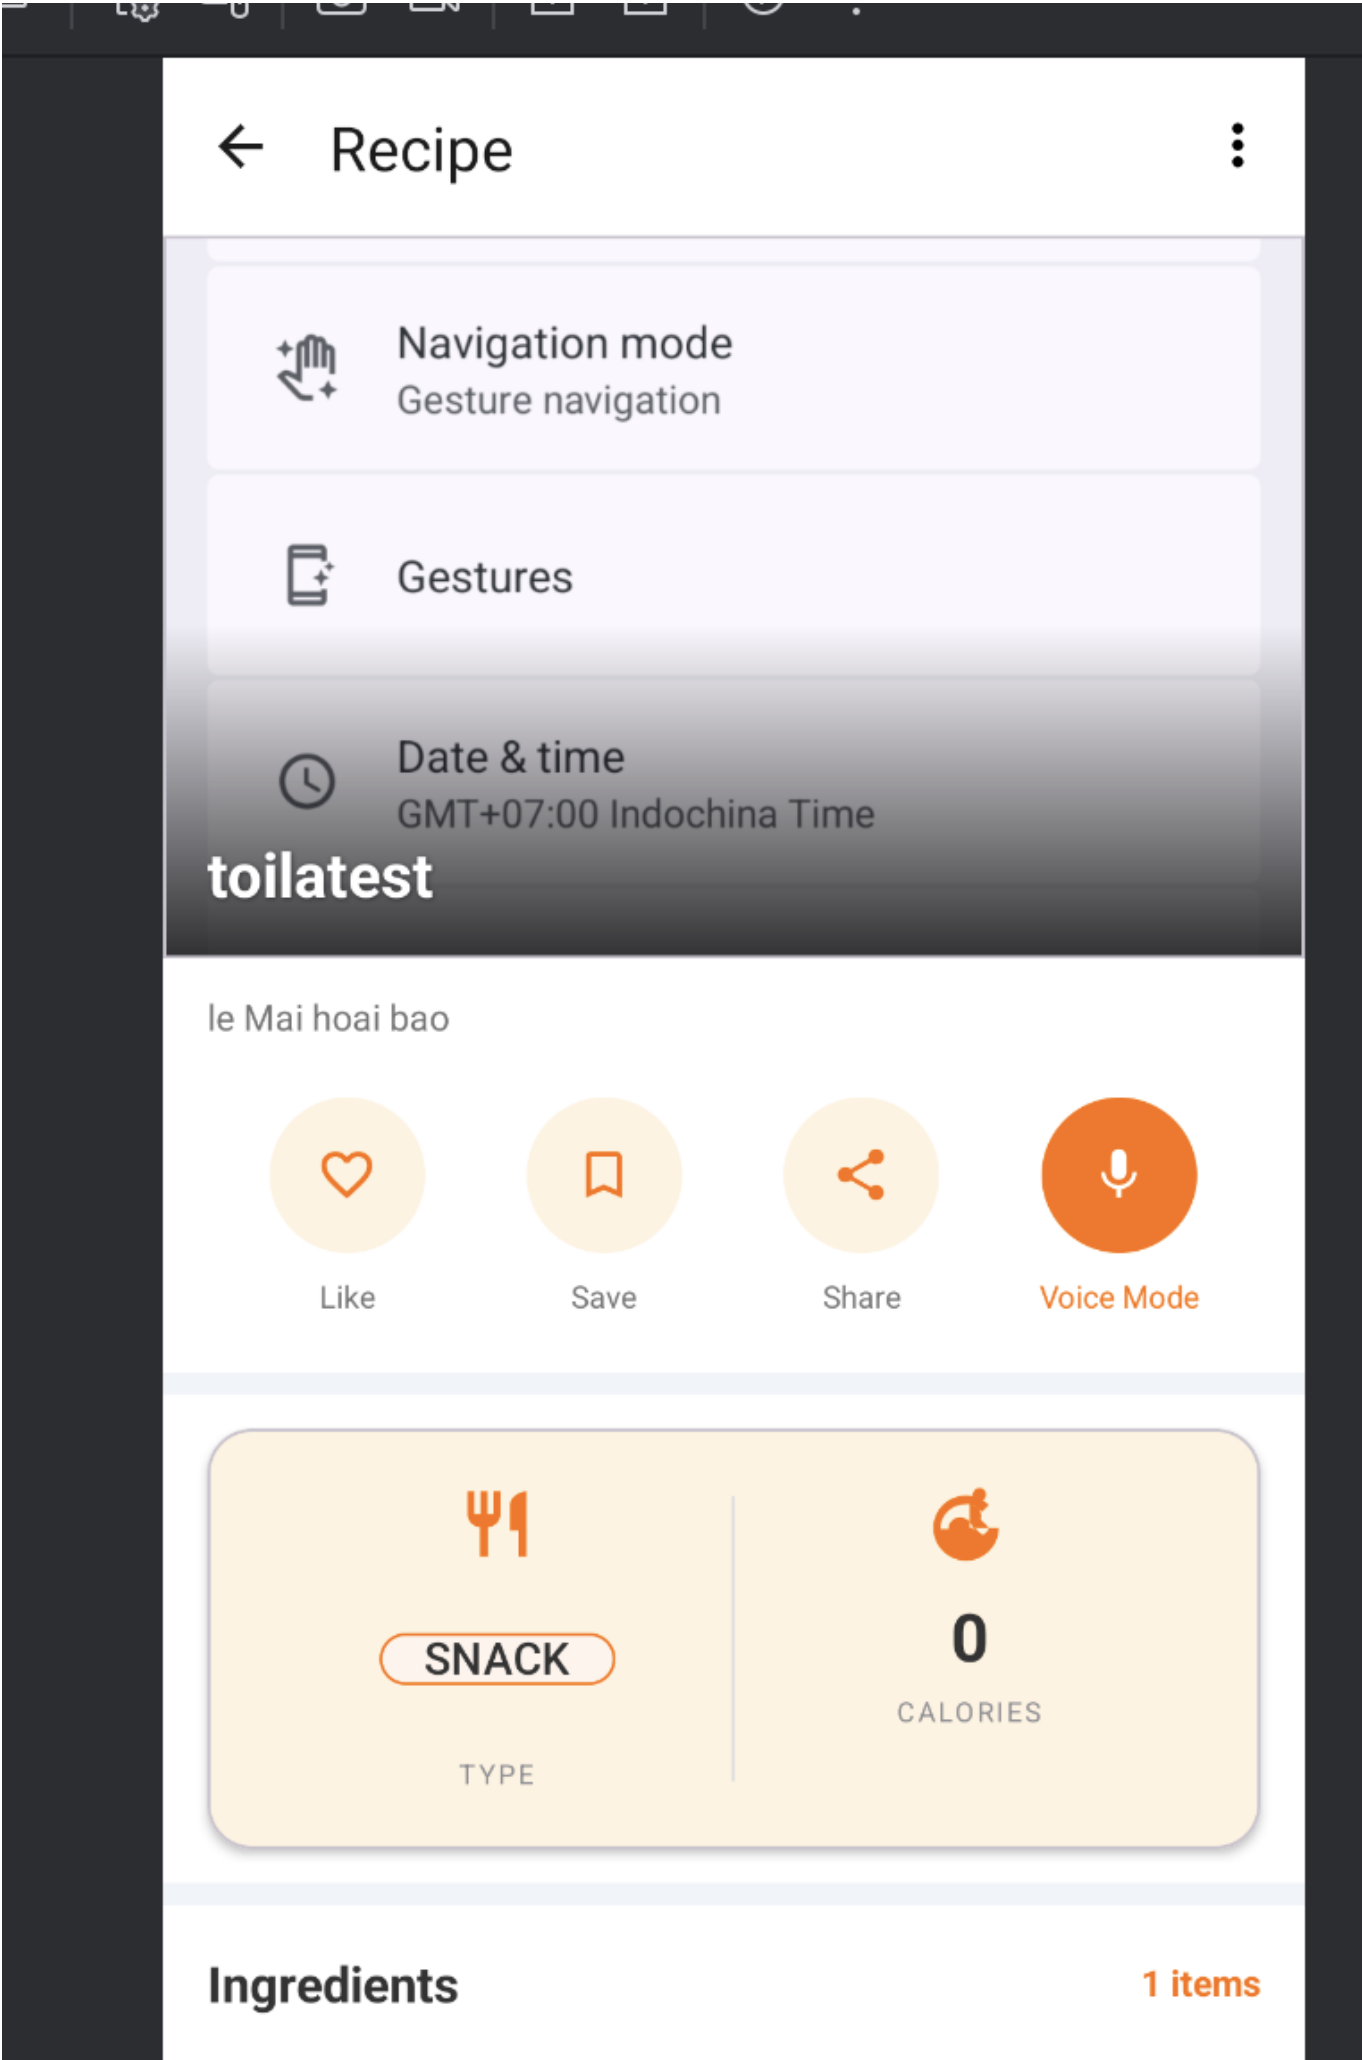

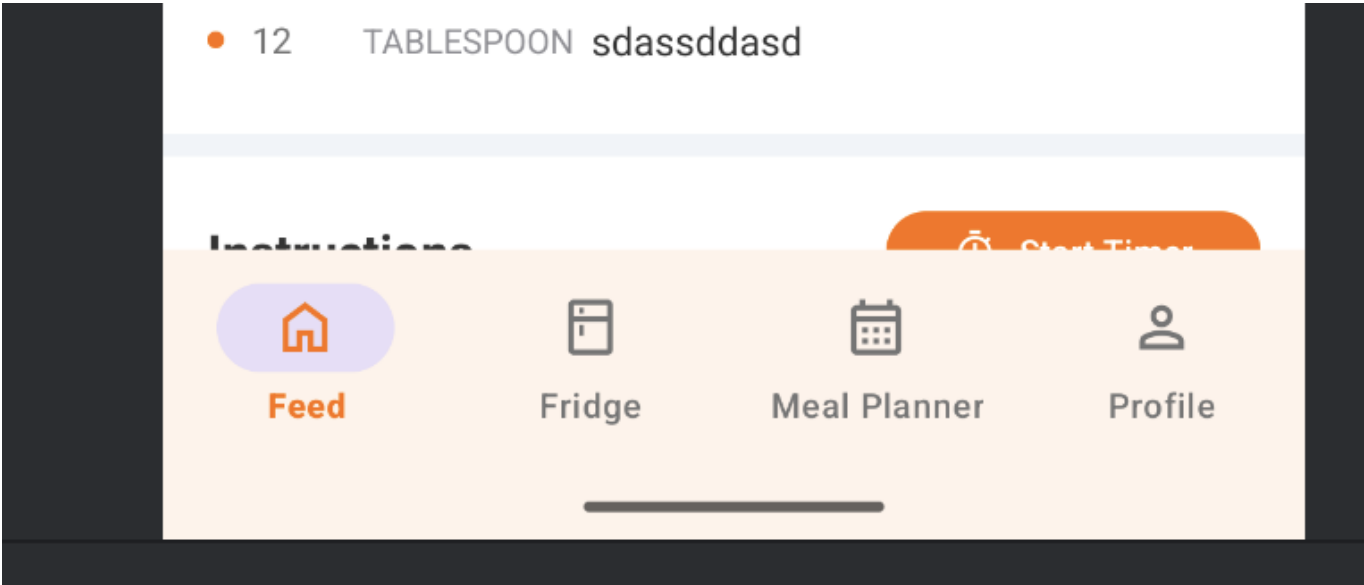

- View recipe detail from search result:

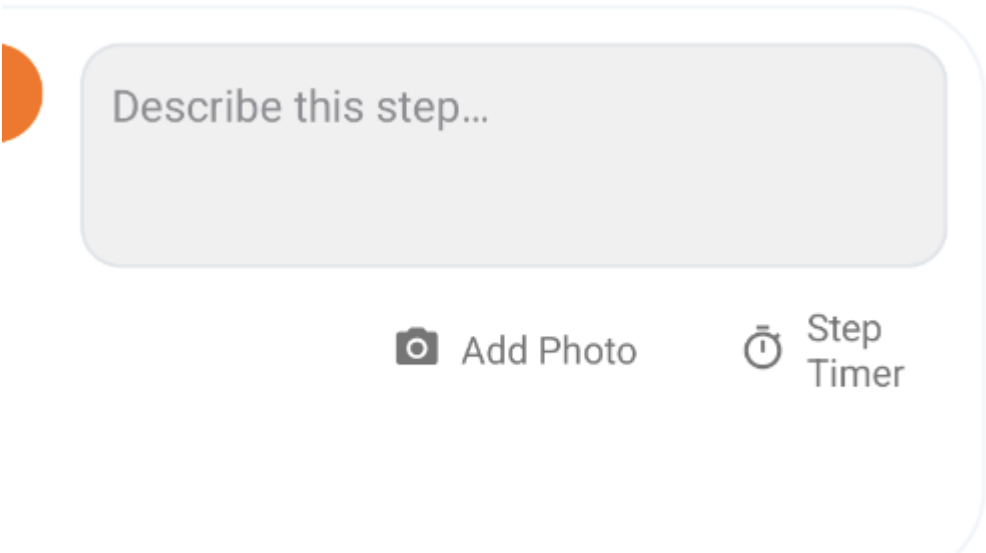

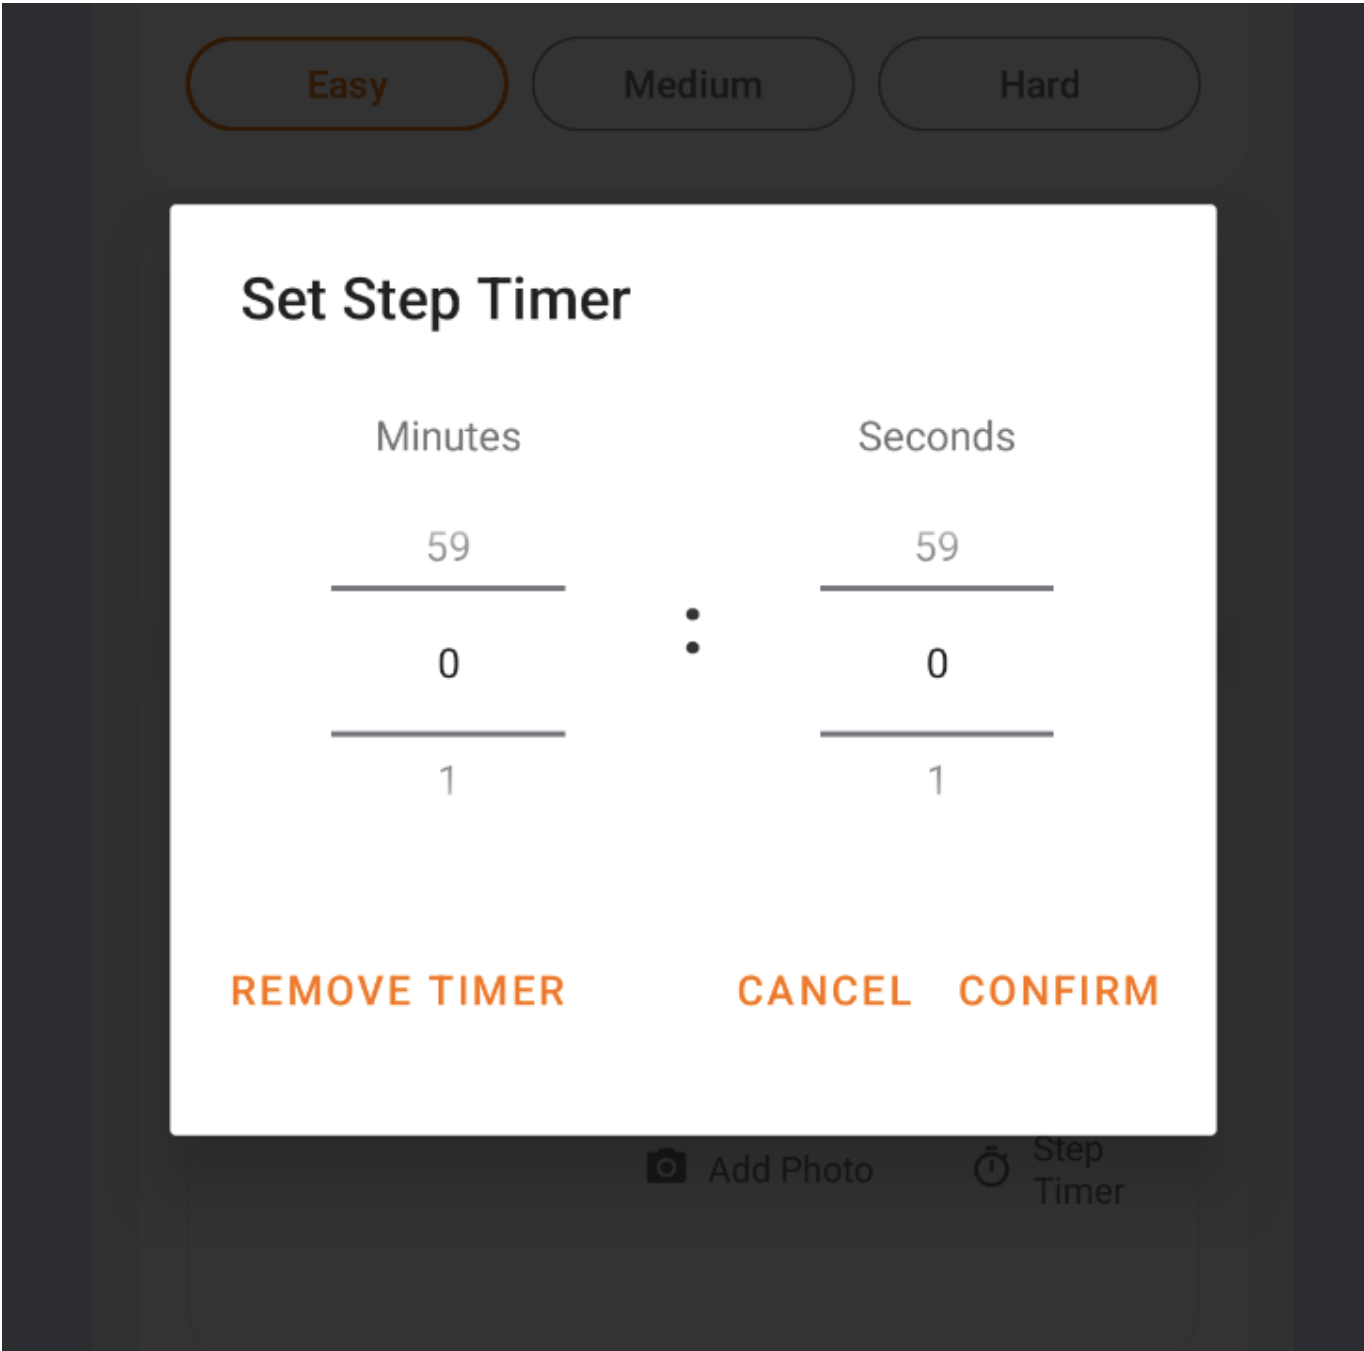

Search UI

- Add timer for each step in create recipe page:

- Commit history:

feat: implement image upload functionality for recipes
- Setup cloudinary.
- Added ApiService method for image upload using Retrofit.
- Created ImageUploadRepository to handle image upload logic.
- Implemented Cloudinary configuration and services for image storage.
- Updated CreateRecipeFragment to support cover and step photo uploads.
- Enhanced UI with progress indicators for image uploads.
- Added necessary XML layouts and strings for new features.
- Updated security configuration to allow image upload endpoints.

feat: Implement Recipe Detail Screen with Ingredients and Steps
- Added IngredientAdapter to display recipe ingredients in a RecyclerView.
- Added StepAdapter to display recipe steps in a RecyclerView.
- Created RecipeDetailViewModel to manage recipe detail data and loading state.
- Designed fragment recipe_detail.xml layout for the recipe detail screen, including hero image, author, action buttons, ingredients, and instructions sections.
- Created item_recipe_ingredient.xml and item_recipe_step.xml layouts for individual ingredient and step items.
- Added drawable resources for UI elements including icons and backgrounds.
- Implemented menu for additional options in the recipe detail screen.

Refactor search functionality and add filter dialog
- Updated FeedFragment to simplify search dialog interaction, passing only the search title to SearchResultFragment.
- Enhanced SearchDialogFragment to manage recent searches with a new RecentSearchAdapter, allowing users to view and clear recent queries.
- Introduced FilterDialogFragment for applying filters to searches, including difficulty levels and ingredient selection.
- Created layout files for filter dialog and recent search items, improving UI consistency.
- Added new drawable resources for icons used in recent searches.
- Updated navigation graph to include search query argument for SearchResultFragment.

commit 5eb11fa79b611da6ee189991483d0314efa025ce

fix: remove focusable attribute from search input for improved usability

commit aa6f1e094af212469ebfda4c0ebabec5179f95c2
Author: LE MAI HOAI BAO <152853155+HB4305@users.noreply.github.com>
Date: Tue Apr 7 00:21:13 2026 +0700

feat: Implement feed functionality with ingredient search and recipe search
- Add FeedViewModel to manage ingredient and recipe search logic.
- Create IngredientChipAdapter for displaying ingredient chips in a RecyclerView.
- Implement SearchDialogFragment for user input on recipe searches.
- Add SearchResultAdapter to display search results in a RecyclerView.
- Create SearchResultFragment to handle displaying search results and user interactions.
- Develop FeedRepository for API interactions related to ingredients and recipes.
- Define DTOs for ingredient and recipe data structures.
- Add layout files for search dialog and search result display.
- Include drawable resources for UI elements.
```

- Implemented the UI for the admin dashboard, including the ingredient and recipe trend charts.
- Integrated the admin dashboard with the backend API to fetch data for the charts and display it correctly.

AI Usage Declaration

23127122 - Nguyễn Duy Thịnh

1. General Information

- **Tool name, version, and platform:** Gemini Thinking 3 for prompt creation, Claude Opus 4.6 (Anthropic) for planning, Claude Sonnet 4.6 (Anthropic) for code generation
- **Access time:** 2026-04-11

2. Usage Details

- **Prompt used:** "Tạo file md chuẩn để tôi prompt plan cùng opus, tôi muốn dựa trên entity đã có (có thể đề xuất thêm bảng nếu cần), và cấu trúc repository cùng service có sẵn (có thể sửa nếu cần) (tôi sẽ list file cần đọc trong file md đó) tôi muốn xây dựng tính năng cho các phần cơ bản của nhóm tính năng mạng xã hội trong app yum recipe này, tạo các endpoint cơ bản như đăng bài, like share comment."
- **Purpose of use:** To generate CRUD code for the new API set with the updated backend.

3. Content Declaration

- **Which content was generated by AI:**

- Social Controller, Social Service, Comment Repository.
- **Which content I modified after AI generation:**
 - Little to none, the generated code are mostly correct, just a bit of adjustment in SocialService to match with current team progress, and minor adjustments to fit the existing code.

4. Evidence of AI Usage

Prompt Plan cho Tính năng Mạng xã hội

◆ Upgrade to Google AI Plus

tạo file md chuẩn để tôi prompt plan cùng opus, tôi muốn dựa trên entity đã có (có thể đề xuất thêm bảng nếu cần), và cấu trúc repository cùng service có sẵn (có thể sửa nếu cần) (tôi sẽ list file cần đọc trong file md đó) tôi muốn xây dựng tính năng cho các phần cơ bản của...

◆ Show thinking ▾

23127205 - Lâm Hữu Khánh

1. General Information

- **Tool name, version, and platform:** Claude Opus 4.6 (Anthropic)
- **Access time:** 2026-04-06 to 2026-04-11

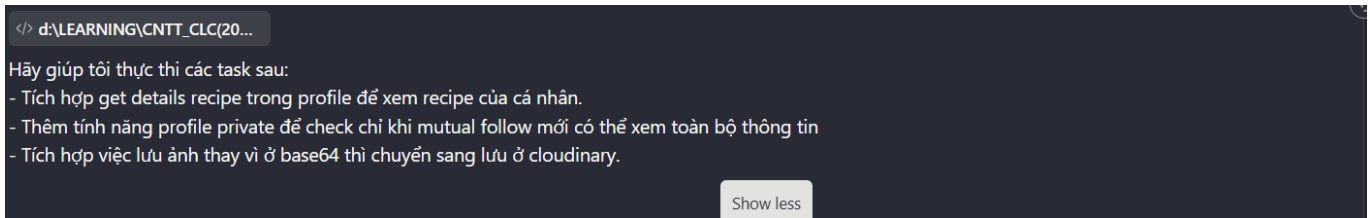

2. Usage Details

- **Prompt used:** "Hãy giúp tôi thực thi các task sau:
 - Tích hợp get details recipe trong profile để xem recipe của cá nhân.
 - Thêm tính năng profile private để check chỉ khi mutual follow mới có thể xem toàn bộ thông tin
 - Tích hợp việc lưu ảnh thay vì ở base64 thì chuyển sang lưu ở cloudinary."
- **Purpose of use:** To implement profile-related features in Yum Recipe, including recipe detail integration in profile, privacy authorization with mutual-follow logic, and image storage migration from Base64 to Cloudinary.

3. Content Declaration

- **Which content was generated by AI:**
 - Suggested implementation flow and code-level changes for profile recipe detail navigation.
 - Privacy handling updates for private profiles and mutual-follow-based access checks.
 - Refactor guidance for replacing Base64 image payloads with Cloudinary upload URLs.
- **Which content I modified after AI generation:**
 - Adjusted implementation details to fit the current Android and Spring Boot project structure.
 - Verified and refined API integration points, error handling, and navigation behavior in app.

4. Evidence of AI Usage

23127326 - Lê Mai Hoài Bảo

1. General Information

- **Tool name, version, and platform:** Claude Opus 4.6
- **Access time:** 2026-04-08 14:30 UTC

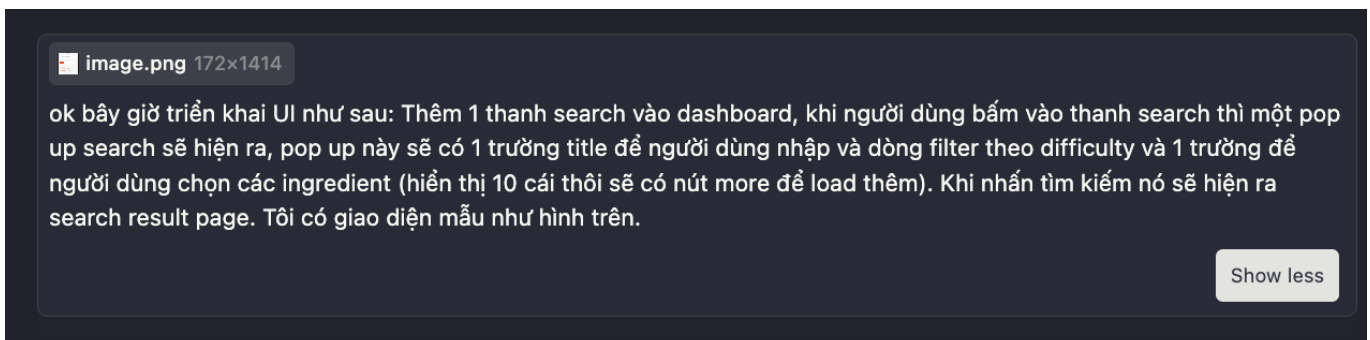

2. Usage Details

- **Prompt used:** "ok bây giờ triển khai UI như sau: Thêm 1 thanh search vào dashboard, khi người dùng bấm vào thanh search thì một pop up search sẽ hiện ra, pop up này sẽ có 1 trường title để người dùng nhập và dòng filter theo difficulty và 1 trường để người dùng chọn các ingredient (hiển thị 10 cái thôi sẽ có nút more để load thêm). Khi nhấn tìm kiếm nó sẽ hiện ra search result page. Tôi có giao diện mẫu như hình trên."
- **Purpose of use:** To implement the search function in the Yum Recipe project, including UI design and API integration.

3. Content Declaration

- **Which content was generated by AI:**
 - UI design for the search function, including the search bar, pop-up search interface, and search results page like mockups.
 - API integration logic for the search functionality.
- **Which content I modified after AI generation:**
 - I was test the generated UI and API integration in the project, ensuring it works correctly and meets the requirements.

4. Evidence of AI Usage

23127357 - Lê Anh Duy

1. General Information

- **Tool name, version, and platform:** Claude Sonnet 4.6 (Anthropic), Codex 5.3 (OpenAI)
- **Access time:** 2026-04-09, 2026-04-10, 2026-04-11

2. Usage Details

- **Prompt used:**

Start Over

okay implement the phrase 4 for me, applying the TDD method, create the service interface and function skeleton first => create test => implement the business logic, please create sub-agent to implement in parallel and use the same context. please follow the current organization.

okay now implement the section 3.1 for me, the function skeleton is provided, make sure it asynchronous, no throw exception, just use log.error for the trace if any error pop.

Tasks Planned for Next Week

23127122 - Nguyễn Duy Thịnh

- Binding the Android social feed with the new API and ensure pagination works correctly.
- Adding articles feature UI and integrate with the API.
- Implementing sharing recipe with QR code + export to image.

23127205 - Lâm Hữu Khánh

- Implement notification from app and interact between user and other
- Implement admin for manage account, manage post

23127326 - Lê Mai Hoài Bảo

- Integrate Voice mode into the recipe detail view.
- Integrate Timer mode into the recipe detail view.
- Implement API and UI for List favorite recipes.

23127357 - Lê Anh Duy

- Binding the chatbot UI to the recipe details view.
- Implementing remains sub-tasks.
